Na področju meritev osvetlitve v predorih sodelujejo z več kolegi. Med njimi je tudi Andrej Mohar (*Temno nebo Slovenije*), ki je s svojo ekipo razvil posebno merilno orodje, ki ne temelji na na nekaj

Človeško oko je sestavljeno iz čepkov in palčic. Ena uporablja svetlobo, druga pa jo preloži v barve, ki so manj svetlebo. Ko ponoči zapeljemo v preveč svetlo površino, se nam svetloba odseva od površine in nam je videti svetlo. Če pa se svetloba odseva od površine, ki je temnejša, nam je videti temno. Če pa se svetloba odseva od površine, ki je svetlejša, nam je videti svetlo. Če pa se svetloba odseva od površine, ki je svetlejša, nam je videti svetlo. Če pa se svetloba odseva od površine, ki je svetlejša, nam je videti svetlo.

Yellow halogen bulb

MH (metal halide) bulb

White light attracts more insects

Comparison

CONCRETE

Better light reflection 50% less energy needed for tunnel lighting

Lasts 3-5x longer (50-100 years)

Non flammable

ASPHALT

Faster and cheaper first installation

Produces smoke at big fires

Heavy vehicles produce wheel tracks

Different shaft heights due to settling down
